

## OUR SOLUTIONS FOR BEST PRACTICES

The American Academy of Pediatrics (AAP) published a recommendation that “**sterile instruments should be used to examine each infant to avoid possible cross-contamination of infectious agents.**”<sup>1</sup>

The following graph shows the significant reduction of the risk of infection that can be achieved by following best practice.<sup>2</sup>

Single-Use Neonatal Eyelid Speculum & Scleral Depressor Kits used by leading NICUs in more than 37 states in the USA reduces the risk of cross-contamination and healthcare-associated infections in retinopathy of prematurity exams, other procedures and injections.

- Designed by a pediatric ophthalmologist for premature infants with an appropriate speculum size easy to insert and remove.
- Reduces risks from improperly sterilized instruments, corneal toxicity and cross-contamination.
- Made of high-quality surgical materials. Not made with natural rubber Latex, DEHP, or PVC.
- Enables hospitals and clinics to ensure that sterile instruments are used for every ROP exam.

Disposable ROP Exam Kits...

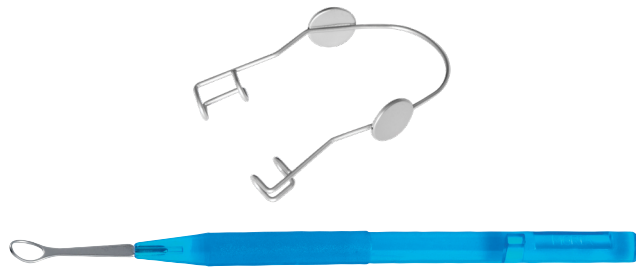

... with Pediatric Wire Speculum with Tabs

#17257X10

**Pediatric Wire Speculum with Tabs & Loop Depressor**

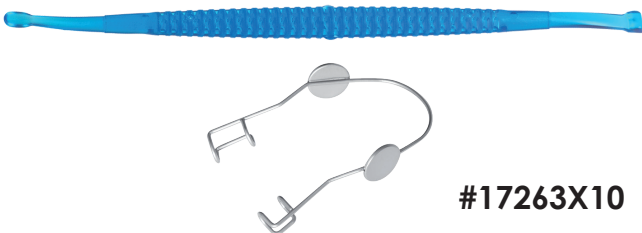

- Sterile & ergonomic design
- Stable tray

#17265X10

**Pediatric Wire Speculum with Tabs & Loop Depressor**

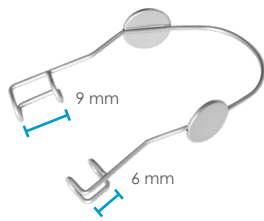

- Sterile & ergonomic design
- **New** compact packaging with less plastic

#17263X10

**Pediatric Wire Speculum with Tabs & Double-ended Depressor**

- Sterile & ergonomic design

#17258X10

**ROP kits with Pediatric Wire Speculum with Tabs**

- Easy to insert and remove
- Appropriate size and flex characteristics for premature infants
- Low profile design that can be used with pediatric eye imaging

**Loop Depressor**

- Gentle curve to facilitate scleral depression
- Ergonomic design for infants
- High-quality finishing

#17253X20

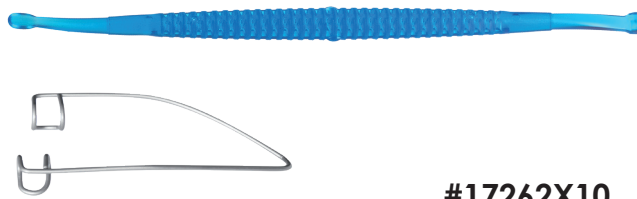

**Double-ended Depressor**

- For 4 distinct orientations
- Ergonomic design for infants
- High-quality finishing
- Can be sold in stand-alone under ref #17253x20

Disposable ROP Exam Kits...

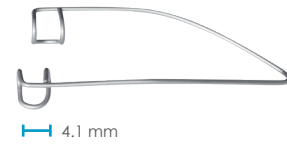

... with Small Neonatal Speculum

#17262X10

#17264X10

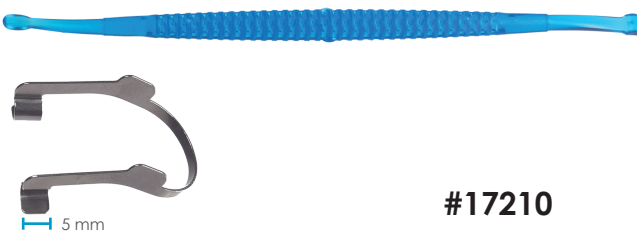

#17266X10

- ROP kits with Small Neonatal Speculum**
- 4.1-mm wire blades
  - Staggered closed wire blades to fit together, for easy insertion and removal
  - Appropriate size and flex characteristics for premature infants
  - Developed with surgeons
  - Can be sold in stand-alone under ref #17266x10

References	Designations	Descriptions	Regulatory
17262X10	ROP KIT XS SPECULUM/2-IN-1 DEPRESSOR	Small Neonatal Speculum & Double-ended Depressor	FDA: approved

17266X10	XS PEDIATRIC WIRE SPECULUM	Small Neonatal Speculum	FDA: approved

... with Solid Blades Speculum

#17210

#17255X20

- ROP kits with Solid Blades Speculum**
- Solid small blades that limit contact with eyelashes during exam
  - Optimal design for easy insertion between eyelids
  - Appropriate size and flex characteristics for premature infants
  - Low profile that can be used with pediatric eye imaging

References	Designations	Descriptions	Regulatory
