Advanced Corneal Surgery ALK/DSAEK/DMEK Course

Course Outline

The Singapore National Eye Centre is pleased to announce the 3-day course, comprising eLearning, didactic lectures, hands-on wet lab, live surgery and clinical case presentations to provide practical insights for corneal surgeons and general ophthalmologists in the surgical and medical management of corneal transplant patients.

1. Didactic Lectures (Overview)

- **Penetrating keratoplasty** versus lamellar keratoplasty – Evidence: Why Change?
- **Anterior lamellar keratoplasty (DALK)** with modified Big Bubble technique, automated lamellar therapeutic keratoplasty (ALTK), Hemi-automated Lamellar Keratoplasty (HALK), preoperative and postoperative management.
- **Endothelial keratoplasty (EK)**: Indications, surgical techniques of Descemet's stripping automated endothelial keratoplasty (DSAEK), preoperative and postoperative management, Descemet's membrane endothelial keratoplasty (DMEK) preoperative and postoperative management.

2. DSAEK & DMEK eLearning

3. Hands-on wet lab experience – ALK/ALTK/DALK/DMEK/DSAEK (participant choice)

4. Case presentation of clinical cases that may be suitable for ALK/DALK/DSAEK/DMEK patients.

The emphasis of this programme is on selective tissue transplantation particularly with different forms of lamellar surgery i.e. ALK, DALK, DSAEK, DMEK.
